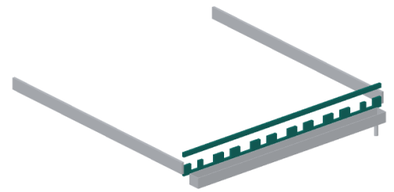
FRONT VIEW

Scale 1:10; looking at the front (along +Y)

RIGHT VIEW

Scale 1:10; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Comb: strip 1,050 x 45 mm. Cap: strip 1,050 x 19.5 mm.
(The views show the cap lifted 40 mm above the comb.)
Eleven notches cut down from the comb's top edge, 33 mm deep,
leaving a 12 mm sill along the bottom. From the centre line:
40 mm wide (distillate tongues) at 97.2, 291.6, 465 each side;
60 mm wide (brine tongues) at 0 and 194.4, 390.6 each side.
Saw the notch sides, chop out with a chisel, file square.
Fit: the comb sits between the side walls, its sill on the same
level as the base ring (inside it). The cap sits on the teeth,
held by two 4 x 30 mm screws into the side walls' end grain.
Each plate drops in from above with its tongues in the notches;
the cap closes the notches above the stack.
Check: every notch 33 mm deep; the cap sits flat on all teeth.

STILLSTACK
