WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut with a long bread knife or a fine saw; wear gloves, a dust mask and glasses. Foil face toward the stack.

Side pieces 1,050 x 52.5 mm; high piece 1,000 x 52.5 mm with the same five openings as the high wall.

Low end: ten blocks 33 mm tall that fill the spaces between the low wall's notches (the end ones stop 15 mm short of each side, for the stop blocks), and a cap piece 1,000 x 19.5 mm.

Drawn: the right half, cap lifted 30 mm; the left is a mirror image.

Glue each piece to its wall with high-temperature silicone.

Pockets: cut a 30 mm hole 10 mm deep behind the pivot and prop hinge holes in the side pieces for the nut and washer.

Check: the foil face is unbroken except at the openings.

STILLSTACK
