WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a block 27 x 15 x 33 mm from the offcut of the 7 mm PPS sheet the stage 1 and 2 rails come from (or glue two pieces together).
It fills the low corner of the liner: its back face against the low wall comb, its side against the side liner.
Its front face is the stop the whole stack bears on: the plate corners and the rail ends touch it, 498 mm from the centre.
Fit: high-temperature silicone on the back and side faces.
Check: the front faces of the two blocks are square to the side walls and 996 mm from the high liner face (plates' length).
