WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Eight rails, 996 x 12 x 7 mm, two per stage.
Stages 1 to 3 (the top three gaps): cut six strips 12 mm wide
from 7 mm natural (tan) PPS sheet; keep the offcut for the stop blocks.
Stage 4: print two rails in teal polycarbonate in four 249 mm
sections each, butt-joined with high-temperature silicone.
Mark each rail with its stage number on the outside face; a teal
rail never goes in stages 1 to 3 (it softens at 113 C).
Fit: each rail lies along a side edge of the plate below, flush
with it, and its low end touches the stop block.
The wick strips stop 10 mm short of the rail (dry break).
Check: 7.0 mm thick within 0.2 mm along the whole length.
