WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut each from a 1.0 x 1.25 m sheet; body as the bottom plate:
996 x 996 mm with the same zigzag low edge (drawn: plate 2).
Six distillate tongues 30 mm wide at the tips and five brine
tongues 50 mm wide at the roots, all left straight. Lengths:
plate 3 (lowest): distillate 68, brine 175 mm
plate 2: distillate 80, brine 186 mm
plate 1 (highest): distillate 91, brine 198 mm
(distillate from the tip line, brine from the root line).
Lip: four 7 mm tabs on the high edge at the rib lines (97.2 and
291.6 mm each side), bent 90 deg down 4 mm, before coating.
Coat the top face; clip the five wick strips under it (SSK-DWG-111).
After it is in the frame: a chevron of silicone on the top face at
each brine tongue root (point up the slope, 3 mm high).
Later bends: distillate 51, 55, 59 mm from the tip line; brine
143, 147, 151 mm from the root line (plates 3, 2, 1).

STILLSTACK
