WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut from a 1.0 x 1.25 m sheet: body 996 x 996 mm with the same
zigzag low edge; five brine tongues 50 mm wide, 210 mm long
from the root line; no distillate tongues (cut the tips flush).
Paint the top face matte black (high-temperature, 600 C class),
tongues excluded. Leave the underside bare.
Bond wick 1 (five strips) under it, as the condenser plates.
Later bend: brine tongues down 90 deg 155 mm from the root line.
Fit: it rests on the stage 1 rails and ribs; its corners touch
the stop blocks. Nothing is fixed to it.
Check: paint fully cured (bake at the maker's schedule) before
it goes in; no paint on the underside.
