WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Four lengths of 25 x 20 x 2 mm angle, 1,078 mm long on the outside corner, mitred 45 deg at both ends.

The 25 mm leg lies on the glazing edge; the 20 mm leg hangs down the outside of the wall.

Drill the 20 mm leg 4.5 mm every 200 mm, 15 mm from the top (about 8 mm into the wall below the tape and glazing).

Run a bead of silicone under the 25 mm leg.

The leg's inner edge stops 14 mm outside the aperture: no shade.

The glazing edge sits 7 mm inside the hanging leg: room to grow.

Fit: 4 x 20 mm stainless screws into the plywood.

Check: the trim holds the glazing down without bowing it.
