WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut the bought lid to 1,000 mm.
Six slots 16 x 36 mm, 3 mm in from the edge that goes against the low wall, centred at 97.2, 291.6, 465 mm each side of the centre line (the distillate tongue lines).
Drill a 6 mm hole at each slot corner and cut between with a sharp knife; deburr. No slot anywhere else: the brine tongues pass 10.5 mm above the closed lid.
Clean with water and mild detergent only.
Fit: snaps onto the channel; the bent distillate tongues go 3 mm down into the channel through the slots.
Check: the lid is tight on the channel all along its length.
