WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 20 lengths of strip 62 mm long; ends filed.
Fold into a U that fits round a 50 mm wide tongue and the 30 mm wick tail under it: a 51 mm base, two 2.3 mm legs, and a 3.4 mm flange turned in over the top of the tongue at the top of each leg.
Spring the flanges about 5 deg tighter than square so they grip.
Fit: slid on from the tongue's tip before the tongue is bent, its 8 mm width lying 7 to 15 mm past the tongue root line, which is clear of the chevron dam (7 mm or more) and of the wall notch. The base lies under the wick tail, holding it against the tongue.
Slide it off the tip to lift the wick out; no adhesive.
Check: the tail is centred under the tongue and pressed flat; the clip is at least 10 mm from the lid once the tongue is bent.
