REVISION HISTORY

Version	Date	Author	Change
0.1	2026-10-24	Amish Chadha	First register (kit 1.9.1 upgrade); sources checked 2026-10-24

StillStack regulatory and standards register

StillStack makes water that people may drink, so two sets of rules matter most: what may touch drinking water, and what may be claimed about the water. The open design is not placed on a market, and no claim of potability is made (SSK-PRB-001, out of scope). This register is not legal advice; anything marked "to assess" needs a qualified reviewer before any product claim. Method: STANDARDS section 23. Sources checked 2026-10-24. No other Water Security repo in the portfolio has a regulatory register yet to share (PotPress covers filter factories, not stills).

Table 1. Regulatory and standards register.

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
G1	WHO Guidelines for Drinking-water Quality, 4th edition incorporating the first and second addenda (2022)	International (guidance)	Microbial, chemical and acceptability guidance for drinking water	The reference for testing distillate before drinking (E. coli, conductivity) and for disinfection and safe storage (PRC safety, STEM S23)	Design lead; partner lab	Applies as guidance
G2	WHO chemical fact sheet, total dissolved solids	International (guidance)	No health-based guideline value for TDS; acceptability only	PR-003 uses 50 mg/L as a carryover check, not a health limit; remineralization note (STEM S24)	Design lead	Applies as guidance
G3	NSF/ANSI/CAN 61, drinking water system components, health effects (2023 edition listed by the Standards Council of Canada)	United States and Canada	Contaminants that leach from materials in contact with drinking water	The coating on the condensing faces, silicone sealant and channels (PR-007). The coater must supply a certificate before the order (SSK-DEC-001, to confirm item 8)	Builder; coater	To assess: no certified coating product seen yet
G4	NSF/ANSI 51, food equipment materials	United States	Materials for food equipment	Alternative listing for the silicone sealant and cord (PR-007)	Builder	To assess per product
G5	Directive (EU) 2020/2184 on water intended for human consumption, Article 11 (materials in contact) and its implementing acts	European Union	Minimum hygiene requirements for materials and products in contact with drinking water	Only if a panel is sold or supplied as a drinking-water product in the EU	Whoever places it on the market	Does not apply to the open design; certification needed later for any EU supply
G6	Regulation (EC) No 1935/2004, food contact materials	European Union	General safety and labelling of materials meant to contact food	Reference for the PP and HDPE channels and the distillate container	Builder	To assess per product
G7	ISO 9806:2017, solar energy, solar thermal collectors, test methods	International	Collector tests including exposure, internal shock and stagnation behaviour	Method reference for a TRL 4 dry stagnation test of PR-008 (on hold under the TRL 3 cap); StillStack is not a heating collector	Partner lab	Applies as a test-method reference later
G8	EN 1995-1-1 (Eurocode 5), design of timber structures	Europe (design values)	Embedment strength of timber and plywood at dowel-type fasteners	Pivot bolt bearing on 12 mm plywood (STEM S14)	Design lead	Applies; used as a design value

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
G9	EN 1991-1-4 (Eurocode 1), wind actions	Europe (design values)	Wind pressure and force coefficients	Wind overturning check of PR-013 uses a force coefficient of 1.2 as a first-order value; site wind not assessed	Design lead	To assess for a named site
G10	National rules on household water treatment claims and brine discharge in the partner's country	Partner country	What a household water product may claim; where brine may go	Instructions and any field trial	Partner NGO	To assess when a field partner is chosen

Status: to assess, applies, does not apply, met by design, certification needed later.
